

**MEMORANDUM**

31 October 2023  
File No. 0202744-001

**TO:** Johnston Architects  
Megan McKay

**FROM:** Haley & Aldrich, Inc.  
David Winter, P.E.  
Ben Blanchette, P.E.

**SUBJECT:** Mercer Island Mixed Use  
Geotechnical Review  
Mercer Island, Washington

Haley & Aldrich, Inc (Haley & Aldrich) has reviewed the project plans and design for the above-referenced project and participated in relevant project meetings assessing its shoring, foundations, excavation, stormwater detention, and dewatering elements. These reviews include the revised permit set dated 27 October 2023, the shoring drawings contained therein and prepared by Ground Support, and the construction dewatering plan prepared by Richard Martin Groundwater, LLC.

The plans and design are consistent with the letter and intent of the Haley & Aldrich revised geotechnical engineering design study dated 12 June 2023. The construction and final building should have a negligible effect on the surrounding properties, utilities, and paved surfaces, in our opinion.
