**RE: Final plans review for Brindley, Permit Number 2203-116
PN 3206000050**

To Whom It May Concern:

I have reviewed the final plan set, dated November 11, 2022, specifically pages C2.00, C3.00, C4.00, C5.00 but also A-1.2 and the Proposed Tree Plan. No significant changes are present that would affect the trees in any manner not already understood and studied in the previous reports submitted.

There is a question on the table about the placement of the jobsite office trailer. I will be meeting with the contractor on December 6th to figure it out.

I will be monitoring the site over the duration of the project and paying special attention to the big #10 tree.
