**RE: INTAKE SCREENING 2204-107**  
**5637 EAST MERCER WAY**

Dear Norine:

Here's our response to the intake comments resulting from the intake conference on the above project, to the extent that a response appears appropriate:

**Structural Calculations**

Supporting structural calculations, produced by Stoney Point Engineering, are attached.

**Conditions Compliance**

We will comply with all the Conditions of Approval for the Reasonable Use Exceptions and Variance and the Mitigation Measures contained in the MDNS applicable to this project. As promptly as possible following the completion of the intake, we specifically will submit the following updates and additional information required by the approvals: any additional temporary and erosion sediment control BPM's; update the proposed wetland buffers and impacts; and prepare an updated Statement of Risks for geological hazardous areas. We long-ago applied for the necessary state and federal permits relating to the project's impact on the on-site wetlands, which the involved agencies are currently processing. We will continue with our efforts to expedite the issuance of these permits.

Please advise if you require any additional information or documentation.

Sincerely yours,

William C. Summers
