CONSTRUCTION MANAGEMENT PLAN

(Project Specific Mitigation Measures)

PROJECT INFORMATION					
Site Address:	Phone Number:				
Owner Name:	Date:				
Contractor:					
Name, title, company, and phone number of Individual who completed this plan:					

OVERVIEW

Mercer Island City Code 17.14 describes the requirements for a construction management plan and construction schedule as follows:

105.6 Construction management plan and construction schedule.

- 1. Every permit issued for the construction of a new single family home with a gross floor area of more than 6,000 square feet, or as required for a permit renewal under section 105, shall provide a construction management plan and a construction schedule for approval by the building official.
- 2. Every permit issued for the remodel or addition to a single family home that will result in the modification of more than 6,000 square feet gross floor area, or the addition of more than 3,000 square feet gross floor area, or as required for a permit renewal under section 105, shall provide a construction management plan and a construction schedule for approval by the building official.
- 3. The construction management plan shall include measures to mitigate impacts resulting from construction noise, deliveries and trucking, dust / dirt, use of the street for construction related staging and parking, off-site parking, and haul routes. The building official may require additional information as needed to identify and establish appropriate mitigation measures for construction related impacts.
- 4. The construction schedule shall identify major milestones, anticipated future phases, and anticipated completion dates. The construction schedule shall establish a timeline for completion of exterior and interior building related construction activity and site work. The construction schedule shall incorporate appropriate measures to address unforeseeable delays and shall provide for contingencies. The building official may require additional information or revisions to the construction schedule.
- 5. The building official is authorized to take corrective measures as needed to ensure adherence to the approved construction management plan and construction schedule.

INSTRUCTIONS

Fill in the blanks in the sections below and check the boxes that apply. The areas with check marks already provided indicate a requirement applicable to all projects. The intent of this Construction Management Plan is to mitigate construction impacts. Check other boxes that apply to your project and fill in the blanks accordingly to mitigate the construction related impacts.

a p	ctivities ar roject rela	Construction Coordinator (CC), responsible for managing the construction related define the Site. The CC will be the primary point of contact for neighbors and City staff regarding sed questions and concerns. The contact information is: title, and company:
haul ro for the notice underg Comm neighb	utes between project p	nunicate proactively with neighbors within 300 feet of the site and those on construction ten the site and nearest arterial street. The intent is to inform them of the scope/timeframe rior to commencing construction, respond to questions/concerns, and provide advance nificant work activities that will impact the street, private roads/driveways, etc. (e.g. lity work, major hauling, roadway paving, unusually noisy/disruptive work, etc.). Fill be in the form of an email, hand delivered letter, or other means that will directly inform CC will provide copies of all communications to the City Engineer mercergov.org

	Provide parking in the right of way immediately adjacent to the site (spaces)
. \Box	Other mitigation:
✓ Imp	lement air pollution reduction methods
•	Use of water to control dust
•	Use of clean fuels for construction vehicles
•	Restrict vehicle/equipment idling
•	Other:
✓ Hau	ling (import/export)/deliveries
✓	The CC will ensure that hauling and deliveries occur in a safe and orderly manner, minimizing impacts to the public (e.g. no idling in the street, not blocking streets or driveways, no
	queueing/parking in the right of way).
✓	Use approved haul routes mainly on arterial streets and avoiding school zones where possible.
	A right of way use permit is required for approval of the haul route.
\checkmark	Limit trucking frequencies to a maximum of six trucks per hour and inform neighbors at least
	three days in advance of heavy haul days (frequencies of four or more trucks per hour) when
	construction access is on a private road or shared driveway.
✓	Limit trucking hours to between and [in no case earlier than 8am or later than 4pm]
✓	Use of certified flaggers at the site entrance and when needed at key locations on heavy haul days.
	Use of barges for major soil import & export.
<u> </u>	The following are activities, frequencies and durations of work that may potentially impact a
	neighbor's convenient use of shared private drive. Mitigation measures are also described:
•	
•	
•	
•	
Miti	gation measures:
•	
•	
•	
•	
Righ	t of way use permits are required for:
•	Materials delivery

- Proposed haul route
- Temporary closures of traffic lanes and sidewalks/paths.

- Utility construction
- Roadway paving
- Frontage improvements

Restoration of City streets and rights-of-way

- ✓ Streets will be swept daily, as required, and the contractor is responsible to restore city streets if damaged. Daily monitoring of streets will be performed.
- ☐ Provide a financial guarantee (bond or set aside) to guarantee cleaning and repair.

CONSTRUCTION SCHEDULE REQUIRED

The construction schedule shall identify major milestones and anticipated completion dates. The construction schedule shall establish a timeline for completion of exterior and interior building related construction activity and site work. Attach a construction schedule that includes the following at a minimum:

- Schedule using generic dates (e.g. week 1, week 2, etc.) rather than specific months (January, February, etc.)
- Project duration
- Duration/timeframe for each phase of construction (demolition, TESC/tree protection, shoring & excavation, foundation, framing, site grading, underground utilities and total construction).
- Description of each phase, with description of noise and traffic generators, and anticipated construction hours for each phase.
- Construction parking management for each phase (eg. on-site, carpool, shuttle from off-island, etc. If a combination, please specify methods).
- The construction schedule shall incorporate appropriate measures to address unforeseeable delays and shall provide for contingencies.

•	Identify any anticipated future phases:
