City of Mercer Island, Building Division

Dear Ruji Ding,

Please see enclosed a new submittal with clearer notes on the new/replaced site area on sheet A0.0. As discussed previously, all work beyond the 1,702 SF of hard surface area replaced is occurring underneath existing roof structures to remain. This should not require us to have a drainage plan and report.

I have updated the water meter sizing document, please see attached.

A note has been added on the drawings on sheet G0.0 outlining requirements determined by the fire reviewer.

Please let me know if you have any questions.

Sincerely,

Matt Mamiya
