### DEFERRED SUBMITTALS

The Applicant is required to indicate all deferred submittals / shop drawings for submittal to the City for review and approval prior to item fabrication / construction. All deferred submittals require pre-approval from the City during the permit review process.

☐ No Deferred Submittals - all design included in these construction documents				
	<ul><li>Connector plate wood roof trusses</li><li>Metal joist / metal trusses</li><li>Premanufactured structures (stairs, etc.)</li></ul>	<ul><li>Exterior cladding</li><li>Window wall / curtain wall construction</li><li>Other:</li></ul>		

#### ENERGY CODE AND WHOLE HOUSE VENTILATION INFORMATION

Indicate where the following information is located within the drawing set and select one box per line below.

Building Envelope- Define all co	omponents of the thermal envelo	pe. Include U-factors, insulation	and moisture control WSEC Table 402.1.2	Sheet:
Energy Credit Information-	nclude complete information on p	plan for options selected and equ	uipment specified wSEC Tables 406.2 and 406.3	Sheet:
☐ No Credits Required	☐ Small Dwelling Unit	☐ Medium Dwelling U	nit	] < 500 sf addition
New Construction Tests- The	following are mandatory testing a	and reporting requirements of W	/SEC Ch 4 for new construction	
<ul><li>Certificate of Energy E</li></ul>	fficiency wsec R401.3 • Duct	Leakage Testing WSEC R403.3.5	• Air Leakage Testing WSEC R402.4.1.2	
Air Leakage test repor	t not to exceed 5 changes	per hour wsrc 1505.4.1.2	Air Leakage per selected energ	gy credits
Whole House Ventilation- Sp	ecify system type below and inclu	ude all system requirements on s	sheet noted wsrc Section M1505.4	Sheet:
Exhaust fans wsrc 1505.4.1.	Supply fans wsrc 1505.4.1	.3 Balanced system wsr	ac 1505.4.1.4 Other permitted system	n

### REQUIRED SPECIAL INSPECTIONS

The Applicant shall complete the following section. One of the options below must be selected prior to permit intake. Chapter 17 of the International Building Code (IBC) requires Special Inspection to evaluate components of construction that are critical to the safety of the structure. The project owner shall be responsible for contracting with and hiring the Special Inspection agents. Structural Special nspectors are required to be certified by the Washington Association of Building Officials (WABO). Geotechnical Special Inspectors shall be a licensed Washington State Professional Engineer. Where Special Inspection is required, all reports shall be emailed to InspectionReports@mercergov.org **and** provided to the City Building Inspector at time of the City inspection.

> Inspections by the City Building Inspector are required in addition to the Special Inspection. Do not cover or conceal any work prior to the City inspection.

## PRESCRIPTIVE DESIGN

This project is entirely non-structural, or is designed following the prescriptive gravity and lateral provisions of the International Residential Code (IRC) only. There are no engineered components that have been designed to the IBC or its referenced standards, e.g. American Concrete Institute (ACI), National Design Specifications (NDS), etc. No Special Inspections are required by IRC.

#### MINOR STRUCTURAL WORK

This project has limited engineered design as permitted by IRC Section R301.1.3 and the construction is of a minor nature as excepted by IBC Section 1704.2. This option must be reviewed and accepted by the building official prior to permit issuance and shall be reevaluated for project revisions and deferred submittals.

#### **ENGINEERED DESIGN**

This project is engineered to the provisions of the IBC and its referenced standards. Per IBC Chapter 17, a Statement of Special Inspection shall be completed by the Registered Design Professional (RDP) in responsible charge. The Statement of Special *Inspections* on coversheet SF2 has been reviewed and completed by the RDP.

#### REQUIRED STRUCTURAL OBSERVATION

Structural Observation may be required by the Registered Design Professional (RDP) in responsible charge or by the building official per IBC Section 1704.6.1. The RDP shall submit written statements to the building official prior to the commencement of observations (identifying frequency and extent of observations) and at the conclusion of work included in the permit (describing the site visit(s) performed and identifying any deficiencies that have not been resolved). Submit all statements to inspectionreports@mercerisland.gov

Structural Observation for this project is required by the:	
Registered Design Professional	Building Official (City use only)

#### **GEOTECHNICAL INFORMATION**

Per Mercer Island City Code, designated geologic hazard areas require a geotechnical report and a statement of risk from a geotechnical professional be included with the project submittal. Refer to MICC 19.07.160 (B)(3) for statement of risk, and City GIS at https://www.mercerisland.gov/igs for hazard mapping. Some proposals may require a site restoration bond.

#### NO GEOTECHNICAL REPORT REQUIRED

over-excavation, soil preloading, etc.

☐ No geotechnical report is required due to either: 1. The absense of geologic hazards on site or 2. Scope of project does not include foundation construction, excavation, or alterations to a hazard (if a report is available or referenced it should be provided)

# GEOTECHNICAL REPORT IS REQUIRED AND INCLUDED WITH SUBMITTAL A geotechnical report is required and has been provided. All construction must comply with the recommendations of the

geotechnical report is required and has been provided. An construction must comply with the recommendations geotechnical report, and a copy of the report and any other geotechnical information must be kept on site at all tin				
	Geotechnical Engineer:	Phone:	Project or report #:	

**SEASONAL DEVELOPMENT LIMITATION -** MICC 19.07.160(F)(2) limits certain development between Oct 1 and Apr 1 ☐ An application for Seasonal Development Limitation Waiver will be submitted and approved prior to any such activity.

The City requires an applicant paid peer review when the Building Official determines any of the following are present:

No grading or excavation will occur between October 1st and April 1st. SDL waiver not applicable.

- Advanced excavation or foundation systems, i.e. soil nail
   Projects that require slope stability analysis or those which could walls, tieback shoring systems, etc.
- pose a significant risk to adjacent properties or structures. • Foundation systems not supported on competent soils, i.e. • Where liquifaction presents significant risk (at waterfront
  - or other high water table with seismic mapping)

REQUIREMENTS FOR □ NEW SINGLE FAMILY BUILD □ DEMOLITION/REBUILD □ ADDITION □ REMODEL □ REPAIR □ DOCK □ SITE IMPROVEMENTS □ SEISMIC RETRO
of the project shall be from approved plans only. No deviation from the approved project plans is allowed without prior approval from the City of Mercer Island.

APPROVALS

Reports documenting the quality of these types of construction are required by the Building Official as authorized by IRC Section R104.4x. The reports must be prepared by a WABO certified inspector for the specific type of construction, as indicated in the description, or as otherwise authorized by the Building Official.

SPECIAL INSPECTOR AND AGENCY INSPECTOR CONTACTS:
Each inspector designated in the field to perform any of the above Special Inspections or City initiated Agency Inspection

A Building Inspection prior to demolition is required for all legally nonconforming single family dwelling to ensure no more than

40 percent of the dwelling's exterior walls are structurally altered. Contact the Building Inspector at (206) 275-7730.

INSPECTOR NAME	INITIALS	COMPANY NAME	PHONE NUMBER	EMAIL ADDRESS
