PROJECT NARRATIVE

We are seeking to create an ADU wholly within our existing home for the use of our multi generational family.

We are proposing to convert the basement of our single family home that has an existing self-contained unit with its own access, family room, bathroom, bedroom, living space and utility room.

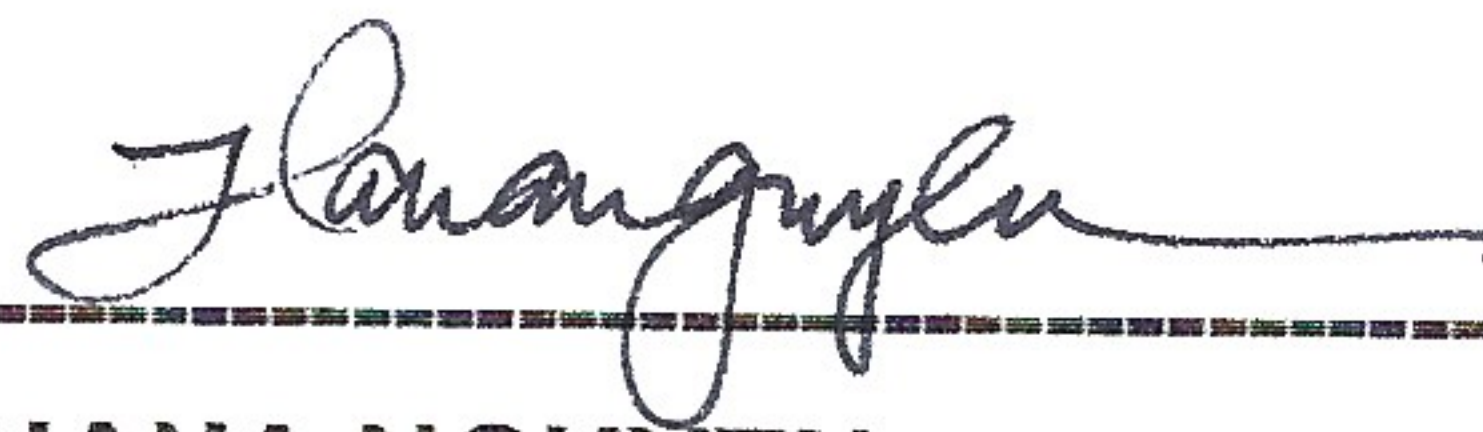

We are looking to add a laundry to the utility area and a kitchen to the family room.

We will update electrical services as well.

No change in footprint, height, area, site coverage, impervious surfaces or landscaping will take place for this project.
