Subject: Coson Retaining Wall Revision at 7709 West Mercer Way
Permit Application No. 0203-066

This project has been reviewed for conformance with the following codes, as adopted and amended by the State of Washington and the City of Mercer Island:

- 1997 Uniform Building Code (UBC)
- 1997 Uniform Administrative Code (UAC)
- 2001 Washington State Energy Code, WAC 51-11 (WSEC)
- 2000 Washington State Ventilation and Indoor Air Quality Code, WAC 51-13 (VIAQ)
- Mercer Island City Code (MICC)

Enclosed are the following documents:

- 2 sets of plan plans
- Miscellaneous calculations
- Miscellaneous geotechnical correspondence
- Other project correspondence

We have made the following red-marks to the drawings:

- We have noted that the deck is not part of the scope of this permit

CAUSE IS "PIPE BROKE"

This project was permitted and constructed to repair the site after a pipe broke and a slide occurred. This revision was intended to bring the permitted drawings into conformance with what was actually built. There was much discussion regarding the location of a sewer line, but with Patrick's approval, it became a non-issue and was determined to be a private sewer line.

Since this was a revision, no Condition of Permit Approval needs to be issued.

We have found the documents submitted to be in substantial compliance with above referenced codes. If you have any questions, please contact me directly at 425-255-3099.

Sincerely,
KOLKE CONSULTING GROUP, INC.
