---

Good afternoon Robin,

As Don Sandstrom has informed you, dumping of dirt and construction debris has begun again on a regular basis on the property at 7216 93rd Ave SE. It was my understanding from the city that this dumping was not allowed without a specific permit.

Myself and my neighbors were notified that we would be advised of new permits being issued for work at this address. Since we have not received notification of permit changes it would seem that this activity is in violation of city mandates.

Please advise regarding permit process and the city's position regarding this matter.

Thank you,  
Best regards,  
Forrest Sipiora
