Dear Residents,

Auburn Mechanical has been working this week on the 3 systems that have been down. They started the leak detection on 1/3/23.

They have completed the leak detection test for one of the systems and have found the cause of the leak. They are ordering parts for the repair. The other two systems are still in leak detection mode searching for the cause of the leak. They noticed smaller leaks in these two systems, but they were not able to find the specific cause of the leaks. They will leave the system in pressure testing mode over the weekend to gather further results of the leak location. Please come to the office if you are in need of a heater. If your heat is working, please return your heater to the office.

Thank you.
