Jeff:

I am writing to oppose Reasonable Use Exception number CA015-001 and Variance number VAR18-002.

I live at 5642 East Mercer Way, which is downstream from this proposed building site in Glenhome. The stream runs directly adjacent to my house. My family has owned our house since 1962. Over the years due to up stream development, the ravine has eroded and we have experience multiple mud slides and flooding of the stream. Last year a portion of East Mercer slid. The amount of water that comes off of the hill is significant. Any more disruption to that system could prove to be detrimental to my home.

Thank you,

Eric R. Blohm
