Nicole,

Better late than never. Sorry it has taken me so long to get back to you re the Eagle nest history on the subject property.

Please find attached documents which highlight the controversy back in 2008/ 2009. Included is USDI letter to Mr. Jeffrey Skall warning him not to damage the tree, a Summary Of Actions Concerning the Eagle Tree and Gerard J. Kaelin's letter of Notice of Liability to the City. All the other references in these documents are in the City's archives. If you have trouble finding them let me know and I will try to dig out my copies.

As far as I know the tree is still an active Eagle site. I personally saw active nest building activities three years ago. I do not see how this property can be developed without destroying this wonderful original growth tree. The Federal Government would probably still take a dim view of the destruction of this tree.

If you can still make me a party of record on this subject it would be appreciated.
