**Subject:** Permit Application at 4825 East Mercer Way

Hi:

I would like to have my name added to those opposing the permit application for averaging the Type II stream buffer and reducing the Type III wetland buffer at 4825 East Mercer Way (parcel number 216200-0070).

Although I do not live directly adjacent to the affected property, the proposed changes do seem to me to put the eagle nesting tree on that site at risk. Mercer Island has limited wildlife habitat. What remains needs protection. Bald eagles nesting and flying over the island provide a thrill and enjoyment for all Mercer Islanders. Thus, loss of their habitat through development impacts all of us.

Please deny this permit application.
