ENVIRONMENTAL CHECKLIST

PURPOSE OF CHECKLIST

The State Environmental Policy Act (SEPA), chapter 43.21C RCW, requires all governmental agencies to consider the environmental impacts of a proposal before making decisions. An environmental impact statement (EIS) must be prepared for all proposals with probable significant adverse impacts on the quality of the environment. The purpose of this checklist is to provide information to help you and the agency identify impacts from your proposal (and to reduce or avoid impacts from the proposal, if it can be done) and to help the agency decide whether an EIS is required.

PRE-APPLICATION MEETING

A pre-application meeting is used to determine whether a land use project is ready for review, to review the land use application process, and to provide an opportunity for initial feedback on a proposed application. Some land use applications require a pre-application – in particular: short and long subdivisions, lot line revisions, shoreline permits, variances, and critical area determinations. The City strongly recommends that all land use applications use the pre-application process to allow for feedback by City staff.

Please note: pre-application meetings are held on Tuesdays, by appointment. To schedule a meeting, submit the meeting request form and the pre-application meeting fee (see fee schedule). Meetings must be scheduled at least one week in advance. Applicants are required to upload a project narrative, a list of questions/discussion points, and preliminary plans to the Mercer Island File Transfer Site one week ahead of the scheduled meeting date.

SUBMITTAL REQUIREMENTS

In addition to the items listed below, the code official may require the submission of any documentation reasonably necessary for review and approval of the land use application. An applicant for a land use approval and/or development proposal shall demonstrate that the proposed development complies with the applicable regulations and decision criteria.

- A. **Completed pre-application.**
- B. **Development Application Sheet.** Application form must be fully filled out and signed.
- C. **Development Plan Set.** Please refer to the Land Use Application- Plan Set Guide in preparing plans.
- D. **Title Report.** Less than 30 days old.
- E. **SEPA checklist.**

INSTRUCTIONS FOR APPLICANTS

This environmental checklist asks you to describe some basic information about your proposal. Governmental agencies use this checklist to determine whether the environmental impacts of your proposal are significant, requiring preparation of an EIS. Answer the questions briefly, with the most precise information known, or give the best description you can.

You must answer each question accurately and carefully, to the best of your knowledge. In most cases, you should be able to answer the questions from your own observations or project plans without the need to hire experts. If you really do not know the answer, or if a question does not apply to your proposal, write "do not know" or "does not apply." Complete answers to the questions now may avoid unnecessary delays later. Some questions ask about governmental regulations, such as zoning, shoreline, and landmark designations. Answer these questions if you can. If you have problems, the governmental agencies can assist you. The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

USE OF CHECKLIST FOR NONPROJECT PROPOSALS

For nonproject proposals complete this checklist and the supplemental sheet for nonproject actions (Part D). The lead agency may exclude any question for the environmental elements (Part B) which they determine do not contribute meaningfully to the analysis of the proposal. For nonproject actions, the references in the checklist to the words "project," "applicant," and "property or site" should be read as "proposal," "proposer," and "affected geographic area," respectively.

A. BACKGROUND

- 1. Name of proposed project, if applicable:

Phillips Residence

- 2. Name of applicant:

Lisa Lu, Baylis Architects

- 3. Address and phone number of applicant and contact person:

10801 Main Street Suite 110, Bellevue, WA 98004; (425) 454-0566

- 4. Date checklist prepared:

05/15/2019

- 5. Agency requesting checklist:

City of Mercer Island

- 6. Proposed timing or schedule (including phasing, if applicable):

Start the construction in April, 2020

7. Do you have any plans for future additions, expansions, or further activity related to or connected with this proposal? If yes, explain:

None

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal:

The lot is characterized by steeply sloping terrain, with portions in excess of 40% slope, the site qualifies as critical areas in Mercer Island's Municipal code.

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain:

None

10. List any government approvals or permits that will be needed for your proposal, if known:

None

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

The Owners are planning to demolish the existing home and build a new three level home. The home will have five bedrooms, five and one-half bathrooms, and will include a three-car garage that would be accessed by way of an existing access easement. We estimate that the home will be approximately 6,310 SF plus the 3-car garage. An approximately 1,557 SF cabana will be developed near the waterfront as well as a dock with a single berth for a small boat that includes a lift.

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

The subject property is located at 2003 82nd Ave SE, Mercer Island, WA.

B. ENVIRONMENTAL ELEMENTS

1. Earth

a. General description of the site (check one):

Flat Rolling Hilly Steep slopes Mountainous Other

b. What is the steepest slope on the site (approximate percent slope)?

60%

c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.

Medium dense, light brown to grey-brown, silty fine SAND

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

None

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

1,452 cy cut and 156 cy fill for house; 169 cy cut and 7 cy fill for cabana

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

In the vicinity of the construction is a steep slope area where erosion could experience erosion.

g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

16%

h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any:

A silt fence will be installed during construction. To mitigate any erosion in that area, temporary

soldier pile shoring will be installed. See attached Geotechnical Engineering Report of the site dated

March 4, 2019 prepared by PanGEO Engineering.

2. Air

- a. What types of emissions to the air would result from the proposal (i.e., dust, automobile, odors, and industrial wood smoke) during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

Exhaust, odors and noise from heavy equipment during construction and minimal dust during excavation and backfill.

- b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

No, does not apply

- c. Proposed measures to reduce or control emissions or other impacts to air, if any:

Water can be used to spray dust during excavation during dry periods. Noise suppression on heavy equipment and limitation of noise during approved working hours.

3. Water

- a. Surface:

- i. Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

Yes. The subject site borders Lake Washington.

- ii. Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

Yes. The subject site borders Lake Washington. A pproximately 1,557 SF cabana will be developed. The proposed footprint would be within 200 feet of these water bodies.

- iii. Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

None, does not apply

- iv. Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

None, does not apply

- v. Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

No

- vi. Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.

None, does not apply

b. Ground

- i. Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well? Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

None, does not apply

- ii. Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, [containing the following chemicals...]; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

None, does not apply

c. Water runoff (including stormwater):

- i. Describe the source of runoff (including stormwater) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

The new residence will create runoff from the roof, driveway, and patio areas. This runoff will be collected with gutters and downspouts and catch basins and connected into tight lines and then released into the adjacent city storm sewer system. The drainage plan to be designed by Eastside Consultants.

- ii. Could waste materials enter ground or surface waters? If so, generally describe.

No

- d. Proposed measures to reduce or control surface, ground, runoff water, and drainage pattern impacts, if any:

See the plan prepared by Engineers Northwest.

4. Plants

- a. Check types of vegetation found on the site
- Deciduous tree: Alder, Maple, Aspen, other
 - Evergreen tree: Fir, Cedar, Pine, other
 - Shrubs
 - Grass

- Pasture
- Crop or grain
- Wet soil plants: Cattail, buttercup, bulrush, skunk cabbage, other
- Water plants: Water lily, eelgrass, milfoil, other
- Other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

Some deciduous and evergreen trees will be removed and some will be replaced. Vegetation retention and replacement are subject to the city's requirements. See Arborist Report prepared by Watershed Company and the landscape plan prepared by KLLA Landscape Architect.

c. List threatened or endangered species known to be on or near the site.

None

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

Many deciduous and evergreen trees will be preserved on the subject site. Decorative landscaping including grass, evergreen trees, shrubs and decorative grasses, and native vegetation planting will be added in disturbed areas. See Arborist Report prepared by Watershed Company and the landscape plan prepared by KLLA Landscape Architect.

e. List all noxious weeds and invasive species known to be on or near the site.

N/A

5. Animals

a. State any birds and animals which have been observed on or near the site or are known to be on or near the site. Examples include:

Birds: hawk, heron, eagle, songbirds, other:

Mammals: deer, bear, elk, beaver, other: None Known

Fish: bass, salmon, trout, herring, shellfish, other: None Known

b. List any threatened or endangered species known to be on or near the site.

See Arborist Report prepared by Watershed Company

c. Is the site part of a migration route? If so, explain.

Not to our Knowledge

d. Proposed measure to preserve or enhance wildlife, if any:

Adhere to all regulations and guidelines. See also Arborist Report prepared by Watershed Company

-
-
- e. List any invasive animal species known to be on or near the site.

None Known. See also Arborist Report prepared by Watershed Company

6. Energy and natural resources

- a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

Electricity will serve the site for lighting, power, cooking, hot water heating. Gas will be used for cooking, fireplaces and space heating.

- b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

No

- c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:

Walls, floors and ceilings will be heavily insulated, low-E glass for window/door, high efficiency gas furnace

7. Environmental health

- a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste that could occur as a result of this proposal? If so, describe.

No

- i. Describe any known or possible contamination at the site from present or past uses.

Police and Fire department services might be needed in an emergency. These services already exist

- ii. Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

None

- iii. Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

None

iv. Describe special emergency services that might be required.

None

v. Proposed measures to reduce or control environmental health hazards, if any:

None

b. Noise

i. What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

Quiet neighborhood with little noise other than residential area noises

ii. What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.

Noise may be created at times during construction activities from machinery and building activity. These will be short term impacts. After construction is complete noise will be typical residential generated noise.

iii. Proposed measures to reduce or control noise impacts, if any:

Construction activities that cause noise will conform to Mercer Island Municipal Code Requirements – and be limited to the hours of 7:00 A.M to 6:00 P.M., M-F and the hours of 9:00 AM-5:00 PM on Saturdays. No construction is allowed on Sundays.

8. Land and shoreline use

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

Private single family residences. No

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

No

c. Describe any structures on the site.

Private single family residence, attached garage and detached cabana.

d. Will any structures be demolished? If so, what?

Yes, the existing single family residence

e. What is the current zoning classification of the site?

R-12

f. What is the current comprehensive plan designation of the site?

Residential

g. If applicable, what is the current shoreline master program designation of the site?

Residential

h. Has any part of the site been classified as an “environmentally sensitive” area? If so, specify.

Yes. The site includes the slopes is in excess of 40% slope, which qualify as steep slopes and sensitive areas according to the Mercer Island’s code.

i. Approximately how many people would reside or work in the completed project?

The home is being designed for a family of 5 people who will reside on this property

j. Approximately how many people would the completed project displace?

One

k. Proposed measures to avoid or reduce displacement impacts, if any:

None, does not apply

l. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:

Adhere to all regulations and guideline

9. Housing

a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.

None, does not apply

- b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.
None, does not apply
-
-

- c. Proposed measures to reduce or control housing impacts, if any:
None
-
-

10. Aesthetics

- a. What is the tallest height of any proposed structure(s), not including antennas? What is the principal exterior material(s) proposed?
30' above average existing grade. Material: stone veneer walls, horizontal siding, stucco, and architectural concrete wall
-
-

- b. What views in the immediate vicinity would be altered or obstructed?
None
-
-

- c. Proposed measures to reduce or control aesthetics impacts, if any:
None
-
-

11. Light and glare

- a. What type of light or glare will the proposal produce? What time of day would it mainly occur?
Lights from residential use during night time, reflections from glass to south during summer months
-
-

- b. Could light or glare from the finished project be a safety hazard or interfere with views?
None
-
-

- c. What existing off-site sources of light or glare may affect your proposal?
Lights from residential use during night time, reflections from glass to south during summer months
-
-

- d. Proposed measures to reduce or control light and glare impacts, if any:
None, does not apply
-
-

12. Recreation

- a. What designated and informal recreational opportunities are in the immediate vicinity?
Water sport
-

b. Would the proposed project displace any existing recreational uses? If so, describe.

None

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

None

13. Historic and cultural preservation

a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.

No

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

None on site

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

None

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

None

14. Transportation

a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

The property is accessed from 81st Ave SE and a private drive.

- b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

No. Transit is available at intersection of N Mercer Way at 80th Ave SE, northwest of the subject property

- c. How many additional parking spaces would the completed project or nonproject proposal have? How many would the project or proposal eliminate?

The new home will include a 3 car garage plus space for approximately 2 additional spaces.

- d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

No

- e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No

- f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and non-passenger vehicles). What data or transportation models were used to make these estimates?

Approximately 4 vehicle trips day

- g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

None

- h. Proposed measures to reduce or control transportation impacts, if any:

None

15. Public services

- a. Would the project result in an increased need for public services (for example; fire protection, police protection, health care, schools, other)? If so, generally describe.

The site is currently for a single family home and is provided with services

- b. Proposed measures to reduce or control direct impacts on public services, if any.

None

16. Utilities

a. Check utilities currently available at the site:

Electricity Natural Gas Water Refuse Service
Telephone Sanitary sewer Septic system Other

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

C. SIGNATURE

I certify (or declare) under penalty of perjury under the laws of the State of Washington that the answers to the attached SEPA Checklist are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Signature: Lisa Lu, Baylis Architects

Date Submitted: 05/15/2019

SEPA RULES

SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS

(do not use this sheet for project actions)

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; productions, storage, or release of toxic or hazardous substances; or production of noise?

Proposed measures to avoid or reduce increases are:

2. How would the proposal be likely to affect plants, animals, fish, or marine life?

Proposed measures to protect or conserve plants, animals, fish, or marine life are:

3. How would the proposal be likely to deplete energy or natural resources?

Proposed measures to protect or conserve energy and natural resources are:

4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection; such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?

Proposed measures to protect such resources or to avoid or reduce impacts are:

5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?

Proposed measures to avoid or reduce shoreline and land use impacts are:

6. How would the proposal be likely to increase demands on transportation or public services and utilities?

Proposed measures to reduce or respond to such demand(s) are:

7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.
