Nicole,

I tried to catch the eagles flying around yesterday from our front yard. Not the best video, but it does provide context to the location of the eagle nest. The eagle nest can be seen in the zoomed in photo, located in the tree directly behind our home and up the hill (adjacent to the proposed building site).

Nicole,

I have a number of videos of eagles flying around. Here is one I took last year when a bald eagle was protecting the nest (just behind our house) from another eagle (a golden eagle I think) you can see them fly by the nest at the top of the conifer tree at second 0:27 of the video. This process continued for 20+ minutes. We will send more pictures and videos as we catch them flying about. I then got a photo of

the bald eagle standing guard and have attached that as well.

Thank you,
Melissa Edling

Nicole,

I hope you are staying safe and healthy while working remotely.
Please see the attached document that outlines our comments on the potential environmental impacts of the proposed project at 74XX SE 38th Street (CAO19-015).

I look forward to your response and a discussion related to the environmental impacts of this project so we can identify next steps. You can call me on at the number below anytime.

Kind regards,

Jason Edling
