RE: Critical Areas Review 1 application – Parcel #2655500253

Dear City Planner:

We have approached the City of Mercer Island to initiate a 440 square foot addition to our existing house at 3836 Greenbrier Lane. In conversations with City Planners, we were informed that the City's GIS system shows a possible watercourse running through our property. We were advised to get an independent ecological report to find out if indeed there is a watercourse, and to submit the findings to the City Planner for review.

You'll find attached the following materials:

- PIN2655500253-SUPP-DEVAPP Development Application form
- PIN2655500253-SUPP-IMAGES Location of our property, pictures of the property ravine, and a sketch showing the location of the proposed addition
- PIN2655500253-SUPP-RECON The report produced by The Watershed Company

Please review the application and accompanying materials and inform us what steps need to be taken in the preparation and submission of our building/remodel application.

Thank you for your attention and you may contact us at the number or e-mail addresses below.

Sincerely,

Alex Maxim
