

Mitigation Plan
6671 E Mercer Way
Mercer Island, Washington

In order to minimize the potential impact of the proposed project, the following mitigation strategies will be implemented.

1. TESC measures will be utilized to maintain erosion control.
 1. Silt fence
 2. Cover Exposed Dirt Piles if necessary
 3. Use Waddles if necessary
2. Disrupted vegetation will be replaced or restored upon completion of the project
3. Project site access will be limited to a paved/sidewalk areas whenever possible
4. Monitoring the impact and taking appropriate corrective measures to maintain the integrity of compensating measures.
