CRITICAL AREA REVIEW 2

The purpose of Critical Area Review 2 is to review critical area studies and mitigation plans in support of proposed buffer averaging and reduction of wetland or watercourse buffers. Critical Area Review 2 is also used to review alterations to geologically hazardous areas. Any work within geologically hazardous areas, wetlands, watercourses, and/or their associated buffers, requires a Critical Area Review 2 unless the activity meets the criteria in [MICC 19.07.130](#), Modifications, or [MICC 19.07.120](#), Exemptions. Critical Area Review 2 applications are often reviewed by third-party peer reviewers, per [MICC 19.07.050](#).

REVIEW PROCESS – TYPE III LAND USE REVIEW

Type III reviews require the exercise of discretion about nontechnical issues. Type III reviews require a pre-application meeting, letter of complete application, notice of application mailing and posting, a 30-day public comment period, notice of decision, and the decision is made by the Code Official. Type III reviews do not require a public hearing.

PRE-APPLICATION MEETING

A Pre-Application Meeting is used to determine whether a land use project is ready for review, to review the land use application process, and to provide an opportunity for initial feedback on a proposed application. Some land use applications require a pre-application meeting – in particular: short and long subdivisions, lot line revisions, shoreline permits, variances, and critical area determinations. The City strongly recommends that all land use applications use the pre-application process to allow for feedback by City staff. For more information on the Pre-Application Meeting process, please refer to the [Pre-Application Meeting Request Form](#).
