Building Official within City of Mercer Island,

R&R is requesting a Wet Season Work Waiver for Foundation Repair at 4121 80th Ave SE, Mercer Island. Scope of work: Installing 9 Helical Piles to lift residence to maximum structural recovery. This proposed work is minor in nature, each helical pile having an excavated hole 3'x3'x3' and backfilled with native soil. Equipment being used is a Dingo (roughly 6.5'x3.5'). The Geotechnical Report has shown this project meets section 19.07.160B3 3. D. The development is so minor as not to pose a threat to the public health, safety and welfare. The underpinning is very minor and associated with the foundation elements only.
