City of Mercer Island,

In the event of a disaster we will contact the City of Mercer Island and Geotechnical Consultant to make them aware of the issue and immediately stabilize the site to mitigate any potential damage or safety concerns on or off site. We will stop any and all earthwork. We will use best practice BMP's to mitigate any erosion issues throughout the construction process.

Sincerely,

A handwritten signature in black ink, appearing to read 'James West-Herr', with a long horizontal flourish extending to the right.

James West-Herr  
Project Manager, Medici Architects
