Travis,

Thanks for taking the time earlier today. As we discussed, I will be filing a comment on the environmental and community impact of the proposed project under separate cover.

This is actually a formal complaint regarding the posting of the public notice. The notice, in my opinion has been posted in a disingenuous manner. I have attached photographs, taken Friday 4/24 at 2:00 pm to illustrate the following

1. The sign is posted in an obscure location, not easily visible to a passerby.
2. The sign is posted in a location which makes it virtually impossible for interested parties to retrieve copies of the Public Notice document.

Regards ,

Robin Samms
