Planning Department
3505 85th Ave. SE
Mercer Island Wa. 98040

Dear Planners and Decision Makers:

Our family and surrounding community find granting a variance for the land owners to the North of Caulkins Landing for a driveway through the trees and across the park property completely unacceptable. We do not want to see one tree cut down or the space that is given to this community divided or reduced in any way.

If you find that this step in the development of this property is proceeding we hope that you will include the community in protecting the rights of the people who use and enjoy Caulkins as a family recreation spot.

Thank you for your consideration and we hope that someone will keep us informed of the processes that effect public access.

Sincerely,

James F. Hale
