**WCI Response to SHL21-002 / SEP21-002 5th Review Letter**

**ATTACHMENTS:**

- Rosen SEPA Checklist 3-10-23
- ROSEN-DOUG - A-PLANSET REVISED 3-15-2023

Waterfront Construction, Inc (WCI) responses appear [in blue](#).

**Planning:**

1. The first submittal of this permit included an affidavit stating that the sewer lake line was field located at this site. However, the Sheet 4 of 16 of the plan set shows that the location of the sewer lake line will be field verified prior to building permit approval. Other sheets of the plan set show that the sewer lake line has been field located. Please clarify this discrepancy and show the field-verified location of the sewer lake line and its associated easement on all sheets of the plans.

[WCI response: Plan set has been revised, please see page 4.](#)

2. Please answer question A.12 on the SEPA checklist. The SEPA checklist will need to be fully filled out before a Threshold Determination can be issued.

[WCI response: SEPA checklist has been revised, please see page 3.](#)
