January 30, 2019

Dear Customer,

The City of Mercer Island's Cross-Connection Control Program (CCCP), outlined in the Mercer Island City Code (MICC) Chapter 15.14, requires lakefront property owners to fill out and return the enclosed Certification.

Since the Boil Water Advisory event in 2014, the updated the CCCP to minimize and/or eliminate potential hazards for health risks related to the water distribution system. Some potential cross-connections may include but are not limited to:

- Irrigation systems using lake water
- Water pumps
- Boilers
- Water operated hydraulic boat lifts
- Water spigots or faucets at or near a dock or lake shore
- Swimming pools or hot tubs
- Radiant floor heating

The water in your home, as well as the public water supply, can become contaminated during a backflow event if an **unprotected** cross-connection exists (for example when water is drawn at high pressure from water mains to fight a fire). **Backflow prevention assemblies (BPAs)** are mechanical valves which stop contaminated water from flowing back into the public water system and are required where cross-connections are present. For the protection of your family and guests, as well as the protection of the City's water supply, the City is using the enclosed Certification to assess the need for installation of BPAs and the presence of BPAs not currently registered with the City.

Pursuant to MICC 15.14.060, you must return the enclosed certification within 30 days to avoid monetary penalties. The completed certification form is due to the City by **March 1, 2019**.

As a homeowner, you are responsible for installing BPAs where required, registering them with the City, and having them tested annually. For more information about the cross-connection control program, please visit www.mercergov.org/backflow.

The City is committed to ensuring safe, reliable drinking water. However, the compliance by Island residents is equally critical to guarantee the success of this program. For questions regarding the backflow certification please call the Public Works Department at (206)275-7608 or email at backflow@mercergov.org.

Sincerely,

Casey Leyde
Water Quality Technician

cc: Building Team, Community Planning & Development
Enclosure: Certification

Service Add: 9843 SE 42ND PL

- Which best describes your facility:
 Residential Multi-family Lakefront Other _____

- Do you have an irrigation system? No Yes If yes, are chemicals injected? No Yes
- Do you use water from another source? No Yes
 If yes, specify source: LAKE (well, pond, lake, tank, cistern, etc.)
 If yes, specify use: IRRIGATION (irrigation, fire protection, car wash, process, etc.)

THERE IS NO CONNECTION BETWEEN IRRIGATION AND CITY WATER SUPPLY SYSTEMS - THE TWO ARE INDEPENDENT

- Do you have a fire protection system? No Yes If yes, is it a flow through design? No Yes

- Do you have any of the following water using equipment?

Heating cooling

- Heating supplied by hot water
- Heating supplied by steam
- Boiler feed line
- Boiler recirculation pump
- Humidifier
- Air conditioning chill water
- Water cooling coils
- Other _____

Bathrooms

- Bathtubs below rim fill faucet
- Sink below rim fill faucet
- Missing toilet expansion valve
- Other _____

Outside

- Hose bib without atmospheric vacuum breaker
- Pressure washer
- Swimming pool
- Hot tub
- Fountain
- Pond
- Other _____

Basement or mechanical room

- Water heater
- Floor sink
- Laundry tub
- Clothes washing machine
- Water softener/filtration
- Other _____

DAYLIGHT BASEMENT

Kitchen

- Sink below rim fill faucet
- Dishwasher
- Chlorinator
- Unprotected hose
- Garbage disposal
- Other _____

- Do you have a backflow preventer? No Yes *DON'T KNOW - DON'T THINK SO.*
If you have more than one backflow preventer list them on a separate sheet.

What hazard is being protected? _____

Installed date: _____ Last test date: _____

Serial #: _____ Do you have a test report? No Yes (If yes enclose a copy.)

Manufacturer, model, size: _____

Specific location: _____

Additional comments:

The City may contact you for additional information or any clarifications needed.

To the best of my knowledge the information provided in this certification is accurate:
