ENVIRONMENTAL CHECKLIST

PURPOSE OF CHECKLIST

The State Environmental Policy Act (SEPA), chapter 43.21C RCW, requires all governmental agencies to consider the environmental impacts of a proposal before making decisions. An environmental impact statement (EIS) must be prepared for all proposals with probable significant adverse impacts on the quality of the environment. The purpose of this checklist is to provide information to help you and the agency identify impacts from your proposal (and to reduce or avoid impacts from the proposal, if it can be done) and to help the agency decide whether an EIS is required.

PRE-APPLICATON MEETING

A pre-application meeting is used to determine whether a land use project is ready for review, to review the land use application process, and to provide an opportunity for initial feedback on a proposed application. Some land use applications require a pre-application – in particular: short and long subdivisions, lot line revisions, shoreline permits, variances, and critical area determinations. The City strongly recommends that all land use applications use the pre-application process to allow for feedback by City staff.

Please note: pre-application meetings are held on Tuesdays, by appointment. To schedule a meeting, submit the meeting request form and the pre-application meeting fee (see fee schedule). Meetings must be scheduled at least one week in advance. Applicants are required to upload a project narrative, a list of questions/discussion points, and preliminary plans to the Mercer Island File Transfer Site one week ahead of the scheduled meeting date.

SUBMITTAL REQUREMENTS

In addition to the items listed below, the code official may require the submission of any documentation reasonably necessary for review and approval of the land use application. An applicant for a land use approval and/or development proposal shall demonstrate that the proposed development complies with the applicable regulations and decision criteria.

A. **Completed pre-application.**
B. **Development Application Sheet.** Application form must be fully filled out and signed.
C. **Development Plan Set.** Please refer to the Land Use Application- Plan Set Guide in preparing plans.
D. **Title Report.** Less than 30 days old.
E. **SEPA checklist.**

INSTRUCTIONS FOR APPLICANTS

This environmental checklist asks you to describe some basic information about your proposal. Governmental agencies use this checklist to determine whether the environmental impacts of your proposal are significant, requiring preparation of an EIS. Answer the questions briefly, with the most precise information known, or give the best description you can.

You must answer each question accurately and carefully, to the best of your knowledge. In most cases, you should be able to answer the questions from your own observations or project plans without the need to hire experts. If you really do not know the answer, or if a question does not apply to your proposal, write "do not know" or "does not apply." Complete answers to the questions now may avoid unnecessary delays later. Some questions ask about governmental regulations, such as zoning, shoreline, and landmark designations. Answer these questions if you can. If you have problems, the governmental agencies can assist you. The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

USE OF CHECKLIST FOR NONPROJECT PROPOSALS

For nonproject proposals complete this checklist and the supplemental sheet for nonproject actions (Part D). The lead agency may exclude any question for the environmental elements (Part B) which they determine do not contribute meaningfully to the analysis of the proposal. For nonproject actions, the references in the checklist to the words "project," "applicant," and "property or site" should be read as "proposal," "proposer," and "affected geographic area," respectively.

A. BACKGROUND

1. Name of proposed project, if applicable:

   CHASE RESIDENCE

2. Name of applicant:

   Olson Kundig

3. Address and phone number of applicant and contact person:

   Olson Kundig, 159 S Jackson St # 600, Seattle, WA 98104
   Contact: Elisa Renouard Phone: 206.788.7876

4. Date checklist prepared:

   10/06/2023

5. Agency requesting checklist:

   City of Mercer Island, Land Use Planning Department

6. Proposed timing or schedule (including phasing, if applicable):

   The following time line is an estimate starting from desired start of Construction. Construction hours of work will be: 7am-3pm and in compliance with MICC 8.24.020C construction to start post wet session as follows: Week 1 Silt fence & Construction Layout,Establish Parking Area, Week 2 House Demo, Week 3-4 Prepare for Shoring Wall, Week 5-6 Excavation , Week 7 Layout of Pin Piles, Week 7-11 Pin Piles, Week 12-20 House Foundation, Week 21-22 Backfill Foundation & Cut in Driveway, Week 23-35 Framing of Structure, Week 25-52 Roofing, Plumbing , Heating , Electrical, Week 52-55 Misc. windows, grading, pick up , Week 55-59 Insulation and Drywall, Week 59-62 Exterior Grading , driveway, house. ,Week 62-74 Interior Finish & Exterior Siding, Week 74-82 Interior/Exterior Painting, Interior Finishes, Week 83-95 Exterior Landscaping, Interior Pick-Up

The following time line is an estimate starting from desired start of Construction. Construction hours of work will be: 7am-3pm and in compliance with MICC 8.24.020C construction to start post wet session as follows: Week 1 Silt fence & Construction Layout,Establish Parking Area, Week 2 House Demo, Week 3-4 Prepare for Shoring Wall, Week 5-6 Excavation , Week 7 Layout of Pin Piles, Week 7-11 Pin Piles, Week 12-20 House Foundation, Week 21-22 Backfill Foundation & Cut in Driveway, Week 23-35 Framing of Structure, Week 25-52 Roofing, Plumbing , Heating , Electrical, Week 52-55 Misc. windows, grading, pick up , Week 55-59 Insulation and Drywall, Week 59-62 Exterior Grading , driveway, house. ,Week 62-74 Interior Finish & Exterior Siding, Week 74-82 Interior/Exterior Painting, Interior Finishes, Week 83-95 Exterior Landscaping, Interior Pick-Up

7. Do you have any plans for future additions, expansions, or further activity related to or connected with this proposal? If yes, explain:

This is a single family residence with no additions, expansions or further activity associated with this proposal.

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal:

For this proposed project a Critical Area Review 2, Arborist Report and Geotechnical report have been prepared to highlight on-site environmental information. This includes on-site watercourse, vegetation, tree inventory, landslide hazard zones etc. Please see reports for all information.

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain:

The property is in review for a building permit. Shoreline exemption application requested.

10. List any government approvals or permits that will be needed for your proposal, if known:

Building Permit and Shoreline Exemption

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

Parcel 7700100205 is a 1.38-acre site located on Lake Washington in Mercer Island, Washington. The western portion of the property has a short segment adjacent to the lake with a watercourse running through the property. The proposal consists of the demolition of an existing residence and construction of a new single-family residence (8678 SF) on the site (67673 SF). Proposal includes landscaping, driveway updates, and associated utilities.

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

The proposed residence is located at 4525 FOREST AVE SE, MERCER ISLAND, WA 98040 (Parcel 7700100205). This residential lot falls under Mercer Island jurisdiction. The lot is located on the west side of Mercer Island and is adjacent to lake Washington located on the westerly portion.

B. ENVIRONMENTAL ELEMENTS

1. Earth

a. General description of the site (check one):

Flat ☐ Rolling ☐ Hilly ☒ Steep slopes ☐ Mountainous ☐ Other ☐

b. What is the steepest slope on the site (approximate percent slope)?

The steepest slope on site is approximately 40 percent.

c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.

Soils found on site per the Geo-tech report include; Fill of loose to medium stiff and consisted of silty sand ranging to sandy silt with varying organic contents. Holocene Lake Deposits of loose to medium dense or soft to medium stiff, silty fine sand ranging to silt with trace gravel. Holocene Mass-Wastage Deposits consisted of medium stiff to stiff, sandy silt with organic inclusions. Pre-Olympia Non-Glacial Deposits consisted of very dense silty fine sand and very stiff silt. Pre-Olympia Glacial Diamict consisted of very dense, dark brown to dark brownish gray, silty, fine sand and very stiff to hard, dark gray massive silt with trace to some gravel. There will be some removal of existing soil from the site.

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

Near the site and to the east is considered a known slide area by the City of Mercer Island as shown on the Mercer Island Landslide Hazard Assessment map, with several identified landslide locations mapped across the slope.

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

The proposed grading for the Building Pad is approximately 2,705 SF of excavation with the driveway requiring approximately 3,337SF of excavation and site grading 3,586 sf of fill. Indicated in the Geotechnical report existing fill that will be excavated on site may be suitable for structural fill on site or on AESI-approved structural fill, an allowable soil bearing pressure of 2,500 pounds per square foot refer to Civil, Structural, and Geo-tech documents for specifics.

The proposed grading for the Building Pad is approximately 2,705 SF of excavation with the driveway requiring approximately 3,337SF of excavation and site grading 3,586 sf of fill. Indicated in the Geotechnical report existing fill that will be excavated on site may be suitable for structural fill on site or on AESI-approved structural fill, an allowable soil bearing pressure of 2,500 pounds per square foot refer to Civil, Structural, and Geo-tech documents for specifics.

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

There is a moderate risk of slope erosion occurring on the steep slope areas of the property outside the currently planned construction area, this risk will be mitigated by following the drainage and erosion mitigation in the Geo-technical report

g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

The total impervious surfaces of project construction is 18 percent.

h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any:

Measures include suggestions from geotechnical and civil engineers per MICC. Some notes include.
1. THE TESC FACILITIES SHOWN ON THIS PLAN ARE THE MINIMUM REQUIREMENTS FOR ANTICIPATED SITE CONDITIONS. UPGRADE THE TESC FACILITIES TO ACCOUNT FOR ALL STORM EVENTS. 2. THE TESC FACILITIES SHALL BE INSPECTED AND MAINTAINED AS NECESSARY OR AS DIRECTED BY THE CITY OF MERCER ISLAND INSPECTOR. 3. CATCH BASIN INSERTS SHALL BE PROVIDED FOR ALL STORM DRAIN INLETS AND CATCH BASINS DOWN SLOPE OF DISTURBED AREAS, WITHIN 500 FEET OF THE PROJECT SITE. 4. WATER LEAVING THE SITE DURING CONSTRUCTION, INCLUDING WATER CARRIED BY TRUCK TIRES, SHALL BE CLEAN. THE CONTRACTOR SHALL IMPLEMENT ADDITIONAL SEDIMENTATION CONTROL METHODS AS NEEDED OR AS DIRECTED BY THE CITY OF MERCER ISLAND INSPECTOR.

1. THE TESC FACILITIES SHOWN ON THIS PLAN ARE THE MINIMUM REQUIREMENTS FOR ANTICIPATED SITE CONDITIONS. UPGRADE THE TESC FACILITIES TO ACCOUNT FOR ALL STORM EVENTS. 2. THE TESC FACILITIES SHALL BE INSPECTED AND MAINTAINED AS NECESSARY OR AS DIRECTED BY THE CITY OF MERCER ISLAND INSPECTOR. 3. CATCH BASIN INSERTS SHALL BE PROVIDED FOR ALL STORM DRAIN INLETS AND CATCH BASINS DOWN SLOPE OF DISTURBED AREAS, WITHIN 500 FEET OF THE PROJECT SITE. 4. WATER LEAVING THE SITE DURING CONSTRUCTION, INCLUDING WATER CARRIED BY TRUCK TIRES, SHALL BE CLEAN. THE CONTRACTOR SHALL IMPLEMENT ADDITIONAL SEDIMENTATION CONTROL METHODS AS NEEDED OR AS DIRECTED BY THE CITY OF MERCER ISLAND INSPECTOR.

2. Air

a. What types of emissions to the air would result from the proposal (i.e., dust, automobile, odors, and industrial wood smoke) during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

Some emissions expected due to general residential construction, including dust, and automobile.

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

There are no known off-site sources of emissions.

c. Proposed measures to reduce or control emissions or other impacts to air, if any:

Proposed measures include use of water to control dust,use of clean fuels for construction vehicles, and the restriction of vehicle/equipment idling.

3. Water

a. Surface:

i. Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

Water in the immediate vicinity of the project include, Lake Washington, and a small Watercourse.

ii. Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

The project will include work adjacent to Lake Washington. (see site plan)

iii. Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

No fill and dredge material placed or removed from surface water or wetlands.

iv. Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

No surface water will be withdrawn or diverted for this project.

v. Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

No, the property is not in the 100 year floodplain.

vi. Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.

No discharge of waste materials to surface waters.

b. Ground

i. Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well? Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

No on site groundwater will be withdrawn.

ii. Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, [containing the following chemicals…]; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

No systems will discharge into ground. All discharge to be tied into city sewer.

c. Water runoff (including stormwater):

i. Describe the source of runoff (including stormwater) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

The main source of runoff is expected from the steep slope areas and water course on the site in the wet season. This is planned to be mitigated in the construction of the property. As the water flows towards lake Washington the Storm water collection system will be upgraded as required by the MICC. A new dispersion trench in the upper limits of the lake buffer is proposed to discharge the site runoff to the lake.

The main source of runoff is expected from the steep slope areas and water course on the site in the wet season. This is planned to be mitigated in the construction of the property. As the water flows towards lake Washington the Storm water collection system will be upgraded as required by the MICC. A new dispersion trench in the upper limits of the lake buffer is proposed to discharge the site runoff to the lake.

ii. Could waste materials enter ground or surface waters? If so, generally describe.

Runoff is a potential on the site due to slope and rain during construction.

d. Proposed measures to reduce or control surface, ground, runoff water, and drainage pattern impacts, if any:

Catch basin inserts shall be provided for all storm drain inlets and down slope of disturbed areas, within 500 feet of project site. Storm water will be upgraded as required by the MICC. A new dispersion trench in the upper limits of the lake buffer is proposed to discharge the site runoff to the lake.

Catch basin inserts shall be provided for all storm drain inlets and down slope of disturbed areas, within 500 feet of project site. Storm water will be upgraded as required by the MICC. A new dispersion trench in the upper limits of the lake buffer is proposed to discharge the site runoff to the lake.

4. Plants

a. Check types of vegetation found on the site

- ▣ Deciduous tree: Alder, Maple, Aspen, other
- ☑ Evergreen tree: Fir, Cedar, Pine, other
- ▣ Shrubs
- ▣ Grass

- ☐ Pasture
- ☐ Crop or grain
- ☐ Wet soil plants: Cattail, buttercup, bulrush, skunk cabbage, other
- ☐ Water plants: Water lily, eelgrass, milfoil, other
- ☒ Other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

Approximately 9,628 SF of the 67,673 SF lot will be disturbed. This includes removal and replacement of 30 trees per MICC 19.10.070

c. List threatened or endangered species known to be on or near the site.

Per the Critical Area 2 and Arborist reports, there are no known threatened or endangered species on or near the site.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

The use of native plants, both shrubs and trees, will be used in the final landscaping of the property in compliance with MICC 19.10. and 19.13.050.

e. List all noxious weeds and invasive species known to be on or near the site.

Multiple invasive plant species on site, including English ivy (Hedera sp.), holly (Ilex spp.), Saint John's wort (Hypericum spp.), and black locust (Robinia pseudoacacia).

5. Animals

a. State any birds and animals which have been observed on or near the site or are known to be on or near the site. Examples include:

Birds: hawk, heron, eagle, songbirds, other:
Mammals: deer, bear, elk, beaver, other:
Fish: bass, salmon, trout, herring, shellfish, other:

Common urban wildlife such as small to medium mammals and birds are expected on or near the site with sitings of Bald Eagles in the area. the site is adjacent to Lake Washington and is noted for listed salmonids.

b. List any threatened or endangered species known to be on or near the site.

Bald Eagles and Salmon have been seen near the site

c. Is the site part of a migration route? If so, explain.

Mercer Island is located within the Pacific Flyway.

d. Proposed measure to preserve or enhance wildlife, if any:

The project is to integrate native vegetation per the code.

e. List any invasive animal species known to be on or near the site.

There are no known invasive species on or near the site.

6. Energy and natural resources

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

Electric, Natural Gas, and Solar will all be used on the proposed residence, Solar will be used to offset the electrical use of lighting and mechanical. Gas will be used to operate kitchen appliances, fireplace, fire pits, and pool heater.

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

There will be no effect to the solar capabilities of adjacent properties .

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:

Solar panels along with large overhangs and shades to reduce sun exposure. Energy efficient appliances are also planned.

7. Environmental health

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste that could occur as a result of this proposal? If so, describe.

There are no known environmental health hazards.

i. Describe any known or possible contamination at the site from present or past uses.

Past uses include a oil tank that was previously on site but has been removed and decontaminated prior to purchase of the property.

ii. Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

No known conditions.

iii. Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

No toxic or hazardous chemicals planned to be used at this time.

iv. Describe special emergency services that might be required.

n/a

v. Proposed measures to reduce or control environmental health hazards, if any:

n/a

b. Noise

i. What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

No known noise would effect the project.

ii. What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.

All high level noise will occur during the hours of (8am-3pm), this is to include but not limited to Hauling and deliveries, Pin Piles for about 1 month (8am-3pm), Excavation of House about 1 month (8am-3pm).

iii. Proposed measures to reduce or control noise impacts, if any:

Proposed measures include hours of operations, along with minimum numbers of daily high volume activities.

8. Land and shoreline use

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

Single Family Residences. No affect to current land uses on nearby or adjacent properties.

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

There is no known history of farm use.

c. Describe any structures on the site.

Existing structures consist of one single family house and adjacent shed.

d. Will any structures be demolished? If so, what?

The existing single family house is to be demolished.

e. What is the current zoning classification of the site?

The site is currently zoned as R-15.

f. What is the current comprehensive plan designation of the site?

Residential

g. If applicable, what is the current shoreline master program designation of the site?

The current SMP designation is CE.

h. Has any part of the site been classified as an "environmentally sensitive" area? If so, specify.

The existing watercourse.

i. Approximately how many people would reside or work in the completed project?

There will be two people who reside at the completed residence.

j. Approximately how many people would the completed project displace?

none

k. Proposed measures to avoid or reduce displacement impacts, if any:

n/a

l. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:

To ensure the proposal is compatible we are submitting for a building permit along with a shoreline exemption permit.

9. Housing

a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.

1 Unit of high-income housing.

b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.

1 Unit of High income housing

c. Proposed measures to reduce or control housing impacts, if any:

n/a

10. Aesthetics

a. What is the tallest height of any proposed structure(s), not including antennas? What is the principal exterior material(s) proposed?

The tallest height of the structure is 29'-4", the primary exterior materials are concrete, wood siding and fiber cement siding.

b. What views in the immediate vicinity would be altered or obstructed?

No views will be obstructed.

c. Proposed measures to reduce or control aesthetics impacts, if any:

n/a

11. Light and glare

a. What type of light or glare will the proposal produce? What time of day would it mainly occur?

Low light and glare will be produced, main hours of light will be from Dusk till Dawn.

b. Could light or glare from the finished project be a safety hazard or interfere with views?

No light or glare problems are to interfere.

c. What existing off-site sources of light or glare may affect your proposal?

No known sources.

d. Proposed measures to reduce or control light and glare impacts, if any:

Roof overhangs and Interior Blinds are integrated into the design.

12. Recreation

a. What designated and informal recreational opportunities are in the immediate vicinity?

Boating, Fishing, and Swimming

b. Would the proposed project displace any existing recreational uses? If so, describe.

No recreational use will be disturbed.

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

n/a

13. Historic and cultural preservation

a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.

No structures exist on site.

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

No known information has been found.

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

n/a

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

n/a

14. Transportation

a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

Highway 90 connects to W Mercer Way to Merrimount Dr finally to Forest Ave SE.

b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

Nearest Public transit Stop is 0.6 miles from the site.

c. How many additional parking spaces would the completed project or nonproject proposal have? How many would the project or proposal eliminate?

Final total of 7 parking spaces will be located on site.

d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

There will be three cuts and patches of asphalt to the existing road for integration of new utility upgrades.

e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No

f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and non-passenger vehicles). What data or transportation models were used to make these estimates?

Unknown

g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

No

h. Proposed measures to reduce or control transportation impacts, if any:

n/a

15. Public services

a. Would the project result in an increased need for public services (for example; fire protection, police protection, health care, schools, other)? If so, generally describe.

No

b. Proposed measures to reduce or control direct impacts on public services, if any.

n/a

16. Utilities

a. Check utilities currently available at the site:

Electricity ☒	Natural Gas ☒	Water ☒	Refuse Service ☐
Telephone ☒	Sanitary sewer ☒	Septic system ☐	Other ☐

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

Electricity and Natural Gas are covered by Puget Sound Energy both utilities exist on site and are predicted to have minimum disturbance in construction. Water and Sanitary Sewer are covered by the City of Mercer Island, during construction the water line will be upgraded and rerun to the new residence at the east side of the property as well as Sewer on the western portion of the property.

C. SIGNATURE

I certify (or declare) under penalty of perjury under the laws of the State of Washington that the answers to the attached SEPA Checklist are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Signature: Olson Kundig/Elisa Renouard

Date Submitted: 12/7/2023

SEPA RULES

SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS

(do not use this sheet for project actions)

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; productions, storage, or release of toxic or hazardous substances; or production of noise?

n/a to this project.

Proposed measures to avoid or reduce increases are:

n/a to this project.

2. How would the proposal be likely to affect plants, animals, fish, or marine life?

n/a to this project.

Proposed measures to protect or conserve plants, animals, fish, or marine life are:

n/a to this project.

3. How would the proposal be likely to deplete energy or natural resources?

n/a to this project.

Proposed measures to protect or conserve energy and natural resources are:

n/a to this project.

4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection; such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?

n/a to this project.

Proposed measures to protect such resources or to avoid or reduce impacts are:

n/a to this project.

5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?

n/a to this project.

Proposed measures to avoid or reduce shoreline and land use impacts are:

n/a to this project.

6. How would the proposal be likely to increase demands on transportation or public services and utilities?

n/a to this project.

Proposed measures to reduce or respond to such demand(s) are:

n/a to this project.

7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.

n/a to this project.
