

# Mercerwood Shore Club Pier Repair Project Narrative

Repair a section of an existing pier (Pier A on plans) by sleeving seventy (70) piles, re-framing, and re-decking with grated decking. A section of Pier A has already been repaired under a previous permit (SHL21-028). Repair an entire pier (Pier B on plans) by sleeving thirty-one (31) piles, re-framing, and re-decking with grated decking. Install concrete panels for an existing boat launch.

The proposed project is exempt from the substantial development permit requirement as it is normal maintenance and repair of an existing structure which is exempt per W.A.C. 173-27-040 (2)(b).
