Hello Robin,

This email's purpose is to reject the access point for the 14 homes to be built on the 2.88 acre parcel. SE 62nd Ave is not a street that can handle 28 cars or more, nor is the neighborhood designed for cul de sacs. The East Seattle neighborhood's attraction is the grid pattern of the streets and the private streets that are more narrow than others.

I strongly recommend having 63rd continue through the 2.88 parcel of land or have access only from West Mercer Way to eliminate heavy traffic through the surrounding streets of the property.

I do not think 62nd ave se is a good cut through street looking at how it dead ends south and takes a small turn north, both directions north and south are narrow streets and cannot handle increased car traffic.

Please consider the quaintness of the neighborhood and keep the car traffic and access point on a road that can handle it, West Mercer Way.

Thank you for your time,
Pam Swendrowski
