Re: SUB20-002
Date: February 19, 2021

I've reviewed the submittal package and have the following conditions of approval:

1. Show all the existing and proposed easements on the final plat. Clearly distinguish all public easements from the private easements. The private utility easement and public utility easement shall not be combined.
2. Easements for utilities and storm drainage facilities shall be depicted on the face of the Final Plat. Language which indicates joint rights and responsibilities of each lot with respect to all utilities and roadways shall be shown along with individual lot Joint Maintenance Easement Agreements (where applicable) for all shared usage and filed with the King County Recorder and noted on the final plat. The easement notation shall indicate whether the easement is public or private, existing or proposed.
3. The Final Plat shall be prepared in conformance with Title 58 RCW and Surveys shall comply with Chapter 332-130 WAC. Submit using Mercer Island's datum and tie the plat to at least two monuments.
4. A City of Mercer Island title block for approval signatures (Planner and City Engineer) shall be provided on the final plat along with the designated Short plat number.
5. Construction of all improvements for access, utilities, all storm drainage system (conveyance system and onsite detention system), and all site work shall be completed as part of future building permits for individual lots. The requirements will be based on the City ordinances, regulations, and requirements of the City Engineer established at the time of application for future building permits.

The following note shall be placed on the final plat:

1. Maintenance and repair of joint use side sewers (sewer lines from the building to the City sewer main), shared roads, access easements, storm drainage facilities shall be the responsibility of the owners of each lot served (with the exception that owners of any lot which is lower in elevation shall not be responsible for that portion of a private side sewer above their connection.) In the event that maintenance and repair of any facilities enumerated above are not performed to the satisfaction of the City Engineer, after a timely demand has been made for such action, the City or its agent shall have the right to enter upon the premises and perform the necessary maintenance and repair to protect the safety and general welfare of the public and shall have the right to charge the owner of each lot an equal share of the total maintenance and repair costs. The City or the owner of any lot within this Short plat shall have the right to bring action in Superior Court to require any maintenance or repair and to recover the costs incurred in making or effecting repairs to improvements.
2. The monitoring, cleaning, maintenance and repair of storm drainage systems in accordance with City Ordinance No. 95C-118 is required for all lot owners within this Plat to control stormwater runoff and control erosion and flooding downstream. All costs related to stormwater runoff control shall be borne by the owners of each lot in equal share. This obligation shall be recorded separately with each individual lot sale and shall travel with the land.
3. All staging for construction shall occur on site and shall not be located in the public right-of-way.
4. Prior to the issuance of a building permit, each application shall be accompanied with a temporary erosion and sedimentation control plan, clearing and grading plan, access and utility service plan, a landscape plan (which shall identify existing vegetation to be retained, limits of all clearing and grading), and a schedule for the construction. The applicant's Civil Engineer, experienced in soils geology and mechanics, shall review the proposed site and building construction and provide recommendations that will limit site disturbance, minimize risk of soils movement, evaluate site slope stability and define materials and construction practices for the work. The Building Official may require that the Engineer be present during construction, monitor the work, and recommend special techniques or mitigating measures. The costs associated with the Engineer's monitoring and mitigation measures shall be borne by the applicant.
5. No permanent landscaping, structures, or fences shall be placed on or within public utility or storm drainage easements without the written approval of the City Engineer. If in the opinion of the City Engineer, utilities or storm drainage facilities require maintenance, repair or replacement, the City or its agent shall have the right to enter those lots adjoining the facility for the purpose of maintaining, repairing, relocating or replacing said facilities. Lot owners shall be responsible for the restoration of any private improvements or landscaping within said easements.
6. Installation of landscaping and/or structures including trees, shrubs, rocks, berms, walls, gates, and other improvements are not allowed within the public right-of-way without an approved encroachment agreement from the City prior to the work occurring.
