

Alternative Site Analysis MIS18

Alternate Pole 1 is 180' from the target pole and will not work because it is the primary power feed.

Alternate Pole 2 is 130' from the target pole and is not feasibly constructible as there are 3 transformers on the pole.

Alternate Pole 3 is 180' from the target pole and will require significant tree pruning.

Alternate Pole 4 is 230' from the target pole.
