

PROOF OF EXEMPT STATUS

UNDER 6409a of the Spectrum Act

4350 – 88th Ave. SE, Mercer Island, WA

Proposed project:

T-Mobile proposes to modify an existing wireless communication facility located on an existing lattice tower by adding (3) antennas (for a total of 6 antennas) and adding six (6) remote radio units. One (1) equipment cabinet will be replaced within the equipment area. Tower upgrades are required to support the structural integrity of the tower and the proposed equipment.

*The proposed project is a modification to an existing wireless communication facility and it **does not** constitute a “**substantial change**.” See proposal above, and the proposal does not constitute a substantial change

*All equipment is currently, and will be after completion, located on an existing lattice tower.

*The proposed modifications will not defeat any existing concealment elements

*Three (3) additional antennas and (6) remote radio units will be added to the tower where T-Mobile’s equipment is currently located.
