Mercer Island WA, 98040

RE: Crown Castle WCF22-001
MIV 43 – ROW near 8215 SE 78th Street

Dear Mr. Leon,

The following response to City review comments dated March 7th, 2022, is being provided as follows:

- **Noiseless Equipment** The radios required for proper network function have a minor noise profile due a requirement for fan cooling. To demonstrate a low noise profile and compliance with City of Mercer Island noise limits, an acoustic study is being provided as part of this resubmittal.
- **Revise Narrative:** A revised project narrative is being provided along with the updated project plans to demonstrate compliance with MICC 19.06.070 and 075

Resubmittal items:

- Project Plans, Dated July 11, 2022
- Noise Study, dated August 31, 2022
- Project Narrative

Crown Castle is committed to working cooperatively with all jurisdictions around the country to secure expeditious approval of wireless facilities. If you should require more information regarding the project design, please do not hesitate to contact me with your questions.

Sincerely,

Amanda Nations
