Community Planning & Development
City of Mercer Island
9611 SE 36th Street
Mercer Island, WA 98040

Dear Community Planning & Development:

Project Description: SD05 AT&T Upgrades

I am submitting an application for WCF-6409 Exemption. The modifications will be taking place on an existing rooftop mounted cell site located at: 7900 SE 28th ST, Mercer Island, WA 98040. The height of the building and the lease space will not be affected by this scope of work. The scope of work qualifies as an Eligible Facilities Request for a minor modification under Section 6409a. (Please note: all work will be performed wholly within the existing premises and utility easements; this site is free of any concealment features; and the project otherwise complies with the site's original conditions of approval.)

<u>Component</u>	<u>Federal Section 6409 Limits</u>	<u>AT&T's Proposed Modification</u>
Increase height of original structure	10 feet or less	No increase in height.
Antennas extending horizontally from edge of structure	6 feet or less	Antennas extend less than 6 feet horizontally from edge of structure
Additional equipment cabinets	4 or fewer, with no cabinets larger than the existing cabinets	No additional equipment cabinets will be installed.

Below is a detailed project description for your review:

AT&T PROPOSES TO MODIFY AN EXISTING UNMANNED TELECOMMUNICATIONS FACILITY BY: removing 3 antennas, adding 3 antennas w/ integrated RRU's, adding 3 DC-6 surge suppressors, and ancillary equipment to existing facility.

Sincerely,

Bernard Dumyahn
