RE:
MIV 43 – ROW near 8215 SE 78th Street

Dear Mr. Leon,

Crown Castle is seeking a Type II land use approval to collocate new small cell equipment on a replacement wood utility pole located near 8215 SE 78th Street.

The City of Mercer Island recently approved attachment of the small cell equipment to the existing pole under WCF22-001. As Puget Sound Energy determined that the pole would need to be replaced prior to installation of the new small cell equipment, a new approval is requested. No other changes to the previously approved scope are proposed

Resubmittal items:

- Project Plans, November 1, 2022
- Noise Study, dated August 31, 2022
- Project Narrative
- WCF22-001

Crown Castle is committed to working cooperatively with all jurisdictions around the country to secure expeditious approval of wireless facilities. If you should require more information regarding the project design, please do not hesitate to contact me with your questions.

Sincerely,

Amanda Nations
