INTAKE SCREENING INFORMATION

WHAT IS AN INTAKE SCREENING?

An Intake Screening is a completeness check for Building and Site Development permit applications. Applications are screened by a Land Use Planner, a Development Engineer (civil), the City Arborist, a Building Plans Examiner, and the Fire Marshal. It is an opportunity to find out if there is anything significant missing from your submittal and to identify issues that may cause a delay in the processing of the application. All Intake Screenings are now conducted electronically. (Ref. MICC 19.09.010)

City Staff conduct intake screenings for the following types of projects:

- A. New Single-Family Residences or Demo/Rebuilds**
- B. Substantial Residential Addition/Remodel Projects:**
 - Projects that net ≥ 500 square feet of additional impervious surface;

 - Upper level addition projects with a valuation greater than \$100,000
- C. Projects that require stormwater improvements:**

WHAT IS THE SCREENING PROCESS?

1. Applicant initiates the Intake Screening by submitting Intake Screening Request Form, paying the fee, then uploading all required submittal documents to the Mercer Island File Transfer Site.
2. City Staff review the electronic submittal for completeness. Each of the five review disciplines will determine if enough information has been provided to complete the first plan review.

NEED A PRE-APPLICATION MEETING WITH CITY STAFF?

Applicants are encouraged to set up a Pre-Application Meeting prior to their Intake Screening. This is an opportunity to meet with staff in-person to discuss your project. Understanding the City's residential development standards, stormwater, tree protection, and fire access requirements early on can avoid costly re-design delays later in the project. For more information see our [Pre-Application Meeting Request Form](#).
