Don,

A short while ago on January 27th at 11:00 am, despite redtagging by the city, Barcelo continued to dump construction debris (and who knows what) on the property. Has the city suspended the red tag situation and issued a permit to allow dumping on this property? Has the permitting process moved on to allow this activity? As of now, the city's previous work stop order was still on sight. Please reply at your earliest possible convenience; photo of this activity is available.

Best regards,
Forrest Sipiora
