---

Nicole,

This is Tom Graue, we briefly spoke last Wednesday regarding the proposed Cherberg dock project status. As I understand the initial project request may have been put on hold and therefore may still be active. My point of request is to remain informed for any new proposed dock design and status.

As I've indicated to Army Corps, any dock design will impact use and safe water way navigation and therefore I need to remain informed on changes to the existing project submission. If a new project is recognized, then I expect I'll be informed through normal Public Notice of Application procedures (notice w/in 300 feet).

Thank you – Tom Graue
