Addendum to Development Application – Project Narrative

Current dock has untreated 2x6 cedar decking that is cracked and worn on its top surface. These boards will be flipped over and secured to structure with stainless steel fasteners. No changes will be made to the existing structure or pilings, nor will the repair increase the current square footage or shape of the dock. The scope of this work is exempt from a shoreline substantial development permit per WAC 173-27-040(2)(b) as it is a normal repair due to deterioration from the elements.
