Re: **SE52XC050, 3023 80TH AVE SE, MERCER ISLAND, WA 98040 Project Narrative**

Sprint PCS proposes to remove all existing wireless equipment associated with their existing rooftop communications facility located at 3023 80th Ave SE, Mercer Island, WA 98040. This includes, but not limited to, all existing antennas, enclosures, mounts, radios, equipment cabinets, cables, & ancillary equipment. All areas affected by the removal will be restored per permitting conditions and/or lease requirements.

The removal will not change the building's original architectural appearance or impact its use. Furthermore, the removal will have no substantial adverse impact on properties or improvements in the surrounding neighborhood. Therefore, Sprint PCS respectfully requests approval on required permits, which will enable Sprint PCS to remove their facility from this location.

Thank you for your time,
